Covid-19 Vaccine Storage Solutions

PATAGONIA SERIES -86°C Dual Cooling System

The Dual Cooling System (Dual System) Ultra-low Freezer avoids conventional cascade refrigeration technology by using two completely independent refrigeration systems each capable of maintaining ultra-low temperatures. If one of the compressors partially or completely fails, the other can continue to maintain freezer temperature at -86°C. Each refrigeration circuit includes a closed-loop cold-wall evaporator configured in parallel to the other.

Dual Cooling System (Dual System) Ultra-low Freezer are also designed to maximize storage samples capacity. 3 upright models with different capacities can meet most of customers' requirements.

SAFETY

- Malfunction alarms including high and low temperature, power failure, sensor error, clean-filter, extremely high ambient temperature, abnormal voltage, thermostat failure, low battery, clean-condenser, door ajar.
- Capable of producing two types of alarm outputs, audible buzzer and visible flashing light.
- Door open feature standard and USB port for temperature data downloading is standard on upright models.
- Alarm for remote contacts.

FIELD PROVEN RELIABILITY

- ✓ Unique insulated inner door design for four separate storage compartments to minimize frost buildup inside the chambers.
- ✓ Specialized control system designed for a well-balanced operation of dual refrigeration system.
- ✓ Positive proven reliability record.

INSTALLATION AND APPLICATION

- Wide range operating voltage system from 110V to 242V to allow units to work properly in areas with poor voltage conditions.
- Suitable for 10°C to 32°C ambient temperature.

ENERGY SAVING

- Unique door seal design to minimize loss of cold temperature during a door opening.
- High performance VIP insulation panels to reduce cabinet heat gain and to improve temperature stability.

KEY DESIGN FEATURES

- Microprocessor controlled system designed to operate unit within temperature range of -40°C to -86°C.
- Adjustable high and low temperature alarms.
- Automatic clean-filter alarm and sensor error alert.
- Adjustable storage shelf height.
- Optional temperature recorder, storage racks and storage box.
- Double security with two independent cooling system, if one system fails, the other can maintain inner temperature at -70°C.

Covid-19 Vaccine Storage Solutions

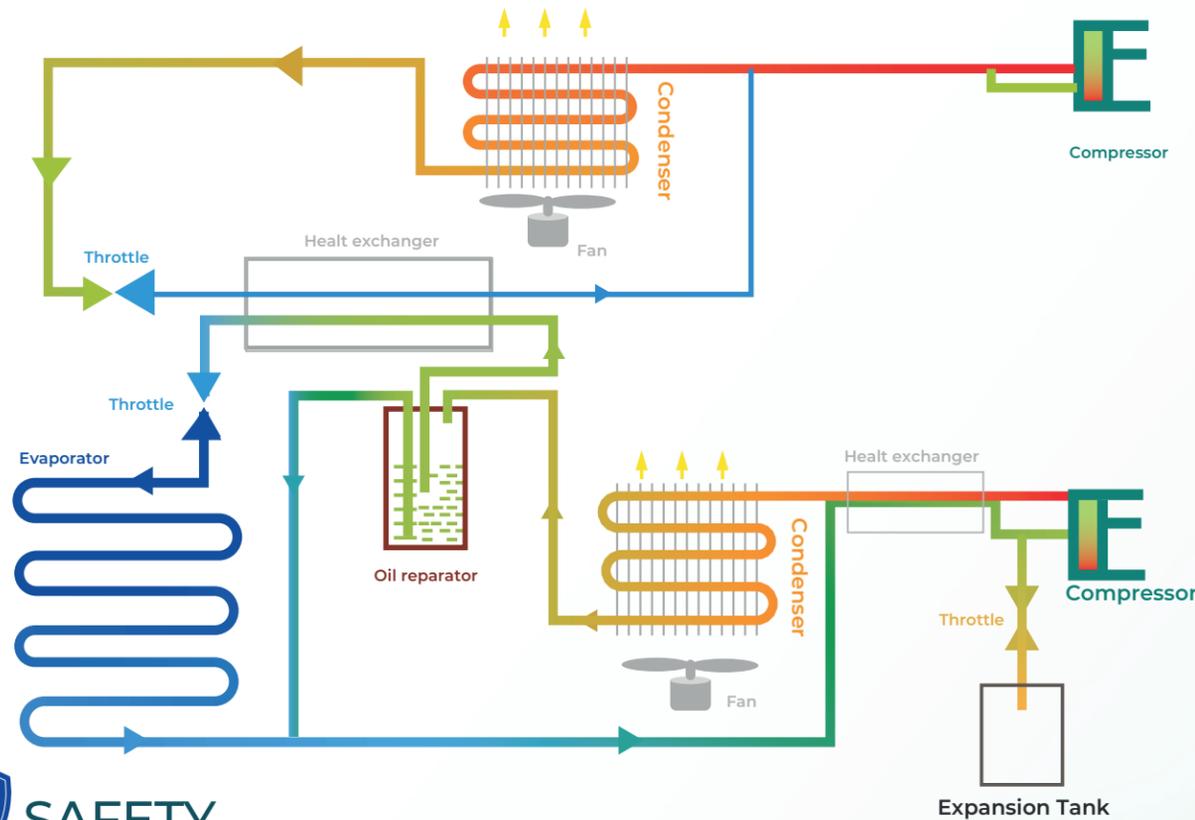

PATAGONIA SERIES

-86°C Cascade Cooling System

Cascade systems are simply two separate compressor-driven refrigeration cycles in a cascade arrangement that achieves ultra-low temperatures by removing heat from the freezer in two stages. The first cycle removes heat from the freezer cabinet with its evaporator and rejects that heat in the second cycle with its condenser. Since there is a significant temperature difference between the condenser of the first cycle and the evaporator of the second cycle, ultra-low temperatures can be achieved.

Cascade Cooling Systems Ultra-Low Freezer are designed to maximize storage samples capacity. 4 upright models with different capacities can meet most of customers' requirements.

Cascade Cooling Systems

SAFETY

- Malfunction alarms including high and low temperature, power failure, sensor error, clean-filter, extremely high ambient temperature, abnormal voltage, thermostat failure, low battery, clean-condenser, door ajar.
- Capable of producing two types of alarm outputs, audible buzzer and visible flashing light.
- Door open feature standard and USB port for temperature data downloading is standard on upright models.
- Alarm for remote contacts.

FILED PROVEN RELIABILITY

- Unique insulated inner door design to four separate storage compartments that minimize frost buildup inside the chambers.
- Specialized control system design for a well-balanced operation of cascade refrigeration system.
- Positive track-record and proven reliability.

INSTALLATION AND APPLICATION

- Wide range operating voltage system from 110V to 242V designed to allow units to work properly in areas with poor voltage conditions.
- Suitable for 10°C to 32°C ambient temperature.

ENERGY SAVING

- Unique door seal design to minimize loss of cold temperature during door opening.
- High performance VIP insulation panels to minimize cabinet heat gain and to improve temperature stability.
- HC Refrigerant with better efficiency & less energy cost. Environmentally friendly.

KEY DESIGN FEATURES

- Microprocessor controlled system designed to operate unit within temperature range of -40°C to -86°C.
- Adjustable high and low temperature alarms.
- Automatic clean-filter alarm and sensor error alert.
- Adjustable storage shelf height.
- Optional temperature recorder, storage racks and storage box.

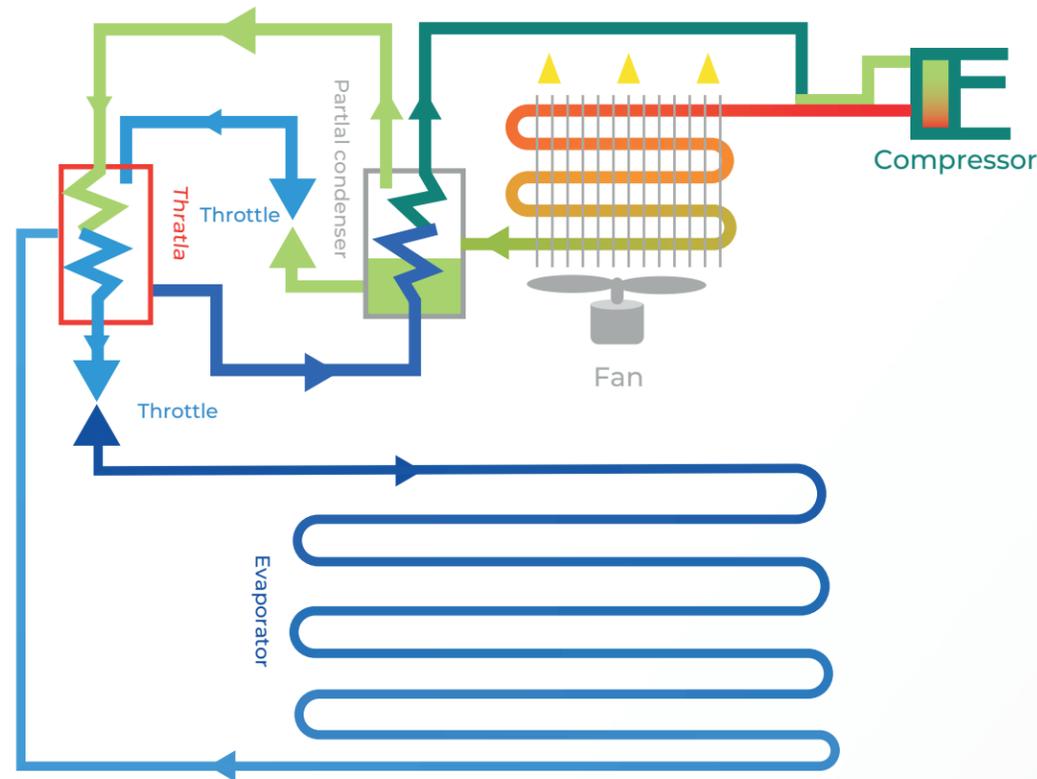

Covid-19 Vaccine Storage Solutions

PATAGONIA SERIES

-86°C Self-Cascade System

ULT freezers utilize cascade systems in order to provide the cooling effort. Self-cascade freezers are often used in small systems due to only requiring a single compressor, or in cryogenic systems as it reduces the need for high efficiency heat exchangers to prevent the compressors leaking heat into the cryogenic cycles. This product is designed and manufactured for long-term storage of a variety of biological products, including viruses and bacteria, red blood cells, white blood cells and skin. It also has applications in blood banks, hospitals, epidemic prevention services, research institutions, etc.

SAFETY

- Malfunction alarms including high and low temperature, power failure, sensor error, clean-filter, extremely high ambient temperature, abnormal voltage, thermostat failure, low battery, clean-condenser, door ajar.
- Capable of producing two types of alarm outputs, audible buzzer and visible flashing light.
- Door open feature standard and USB port for temperature data downloading is standard on upright models.
- Alarm for remote contacts.

INSTALLATION AND APPLICATION

- Wide range operating voltage system from 110V to 242V designed to allow units to work properly in areas with poor voltage conditions.
- Suitable for 10°C to 32°C ambient temperature.

FIELD PROVEN RELIABILITY

- Unique insulated inner door design for separate storage compartments to minimize frost buildup inside the chambers.
- Specialized control system design for a well-balanced operation of cascade refrigeration system.
- Positive track-record and proven reliability.

KEY DESIGN FEATURES

- Microprocessor controlled system designed to operate unit within temperature range of -40°C to -86°C.
- adjustable high and low temperature alarms.
- Automatic clean-filter alarm and sensor error alert.
- Adjustable storage shelf height.
- Optional temperature recorder, storage racks and storage box.

ENERGY SAVING

- Unique door seal design for the minimum loss of cold temperature during a door opening.
- High performance VIP insulation panels to minimize cabinet heat gain and to improve temperature stability.

Patagonia Product Line

Covid-19 Vaccine Storage Solution

PATAGONIA SERIES

-25°C 30°C Mobile Cooler

• To store and transport blood, serum, plasma, vaccine, reagents and special medicines in medical industry. Also used as medicines pass box for epidemic prevention station, blood bank, health center, CDC, animal husbandry bureau, army and logistics service, express company, pharmaceutical factory, genetic engineering.

USER FRIENDLY DESIGN

- The entire cooler may roll to prevent collision damage during transportation.
- Multi-level stacking.

SECURITY GUARANTEE

- Audible and visible functional alarm system.
- Remote control.
- Constant alarm after power off.
- lockable Keyboard.

FEATURES

- Multiple voltage settings used as AC110/220V or DC12V/24V.
- Power supply of cigarette lighter.
- Fully mobile structure.
- Combined with forced air cooling system and direct cooling system.
- Multi-function: 3 ranges of inner temperature:
 - 2 °C - 8 °C used as pharmacy refrigerator
 - -10°C ~ - 25 °C used as deep freezer
 - 22 ± 2°C used as incubator

PATAGONIA SERIES

-40°C Medical Freezer

This product is designed to store vaccines, blood plasma, and many other biological materials. Installations can be found in researching institutions and clinical sites in life science, electronic testing and medical markets.

KEY FEATURES

- Microprocessor control, adjustable temperature range: - 20 °C to - 40 °C.
- LEO digital display and increment at 0,1°C.
- Permanently lubricated cooling fan for safety and longevity.
- Independent inner door to avoid more cooling leaking out, and provide more stable inside temperature performance.
- High density CFC-Free urethane foam insulation.
- Height-adjustable shelf trays allow you to adjust the inside of the chambers according to the size of the samples. By changing the height of the shelf trays, the unit can accommodate various sizes of samples including stored in your conventional model.
- Door latch with provision for a padlock for extra protection of samples.
- Equipped with separate doors that suppress the leakage of cold air during opening and closing of the doors, and manual defrosting that helps avoid temperature impact on the samples.
- 2 independent doors, 2 Compressors, 2 Test Holes, 2 Displays.
- Standard with thermal printer to record 1 year 's data.

RELIABILITY

- Chemically stable, CFC -free, commercially available and environmentally safe refrigerant.
- Optimized refrigeration system designed to maximize cooling effect and temperature uniformity
- Microprocessor control, digital display, adjustable temperature range: - 20°C--40 °C
- LEO digital display for clear observation.
- Single temperature control system with double door construction.
- Flexible and easy storage by height-adjustable shelf trays.
- Maintains the quality of the samples during preservation.
- 2 completely independent chambers with their own temperature displays.

ELECTRIC CONTROL

- Wide voltage tolerance design with applicable voltage range of 187-242V/AC.

ERGONOMIC DESIGN

- USB data logging and temperature recorder (optional).
- Build-in lock with safety and beauty.
- Lockable caster design for customer to move as needed.

SAFETY

- Multiple malfunction alarms to detect high and low temperature, sensor error, power off, temperature controller malfunction, door ajar.
- Two types of alarm indications: audible buzzing and visual flashing light.
- Corrosion proof cabinet interior design.
- Power failure protect: the device would be attack by the high current when all devices restart simultaneously, the start-delay function would protect device from the damage.
- To securely preserve /manage the valuable samples, in addition to a standard-feature door lock, a hole in the latch allows a padlock to be attached.
- Security functions that help protect valuable samples with a temperature control capability that inhibits the change in temperature inside the chamber and an alarm /security function that prevents errors, the unit maintains the quality of the preserved samples.
- Temperature recorder (optional)
- Front-mounted display /control panel located at convenient height for easy access.
- Insulated door with gasket for sample protection and uniformity.
- 2 USB port interface.

ADDRESSING GLOBAL REFRIGERATION NEEDS

-25°C Deep Freezer

PATAGONIA SERIES

-25°C Deep Freezer

KEY FEATURES

- Independent inner door to avoid more cooling leaking out, and provide more stable inside temperature performance.
- Upright side door with build-in handle for easy-opening; limit door hinge to prevent collision when door open.
- Lockable caster design for customer to move as needed.
- Wide voltage tolerance design with applicable voltage range of 187~242 V/AC.

RELIABILITY

- Chemically stable, CFC-free, commercially available and environmentally, safe refrigerant.
- High density CFC-Free urethane foam insulation for rigidity and stable storage temperature.
- Microprocessor control, digital display adjustable temperature range: -100C ~ -250C.
- LEO digital display for clear observation.

+2~8°C Pharmacy Refrigerator

NEW RELEASE

- MDF-25V368RF/M D F-40V368RF Temperature range: Refrigerator Room: 2°C ~ 8°C.
- Freezer Room: -100C ~ -250C/-20°C ~ -40°C
- 2 Independent temperature display, 2 Independent door: heated foam glass door + foamed door.
- 3 shelves in refrigerator room; 6 drawers in freezer room.

SAFETY

- Multiple malfunction alarms including high and low temperature, sensor error, power off, temperature controller malfunction, door ajar.
- Two types of alarm indications: audible buzzing and visible flashing light.
- Power failure protect: the device would be attack by the high current when all devices restart simultaneously, the start-delay function would protect device from the damage.
- Controller password protect function to avoid change running parameter randomly.

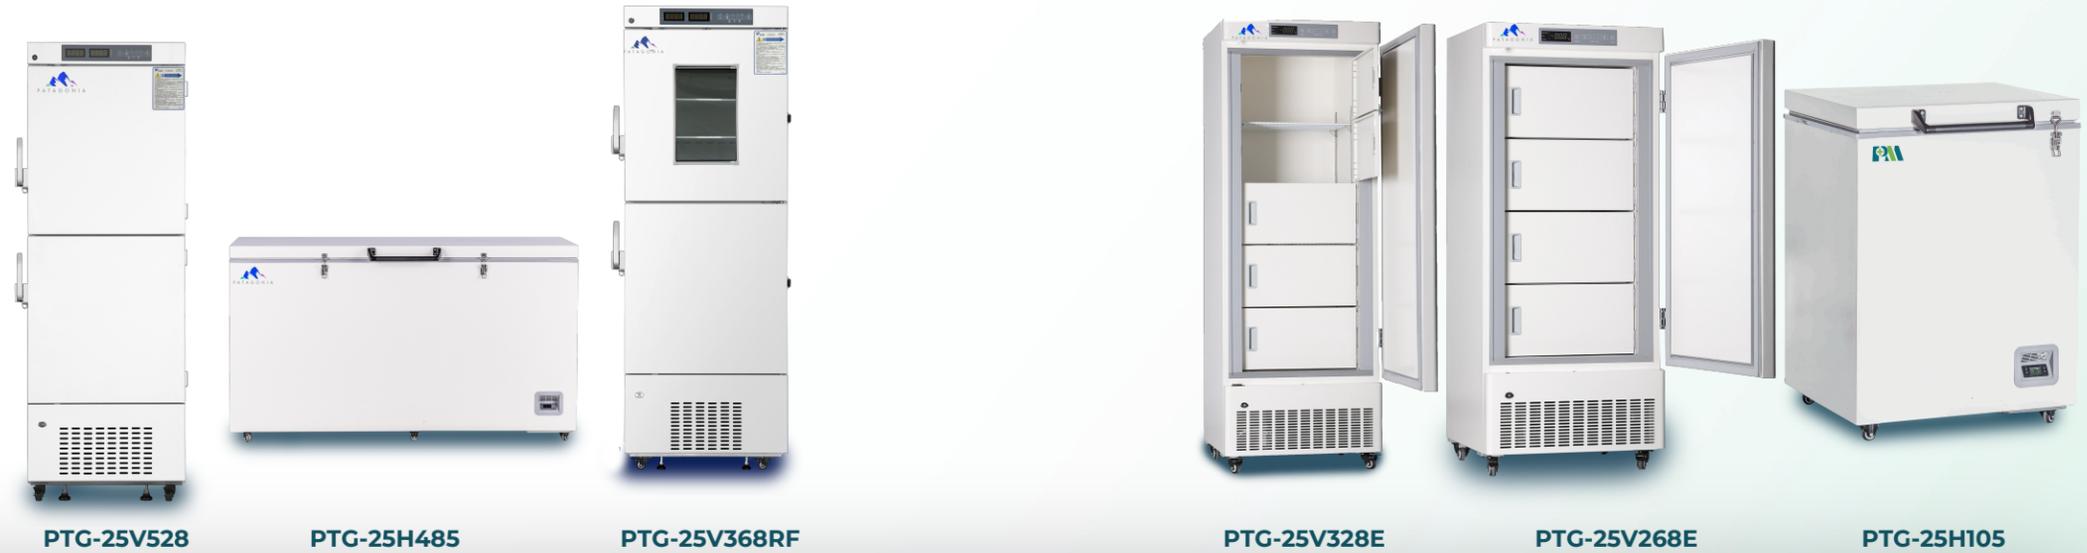

ADDRESSING GLOBAL REFRIGERATION NEEDS

+2~8°C Pharmacy Refrigerator

Patagonia Product Line

Covid-19 Vaccine Storage Solutions

+2~8°C Pharmacy Refrigerator

See our additional catalogo for further details

PATAGONIA SERIES

2°C~8°C Pharmacy Refrigerator

PURPOSE

- Professional refrigerator to store blood, as well as medicines and bio products
- Suitable for blood banks, hospitals, CDCs

RELIABILITY & KEY FEATURES

- Microprocessor controlled forced-air cooling with electrical heat compensation system.
- Digital temperature display for upper and lower sections in chamber with 0,10C resolution.
- Consistent cabinet temperature 20C ± 6 °C
- High-tech integrated sensors to display and control temperature.
- Auto-defrost to remove moisture on cooling surface.
- Large digital display for ease of observation.

SAFETY

- Build-in backup battery to display temperature and to operate audible and visual alarm systems for up to 72 hours without ac power.
- Equipped with a complete temperature alarm system featuring audible buzzer and visible flashing light.
- Five alarm conditions: High/low temperature, power failure, voltage abnormal, door ajar, backup battery.
- Standard with laser printer.
- Standard with acrylic inner small door, for less affection on other room when one door open.

ERGONOMIC DESIGN

- Safety lock to prevent unauthorized access.
- Storage space designed for easy sorting of a variety of blood products Caster design and interior light
